Project(s)

Covid Monitoring WebApplication

- This was done as a **group**(group of 5) **project** for the Problem statement given at Sri Krishna institute's (**T1 Hacks**) intra-college Hackathon.
- This project is to **monitor the body conditions of Patients and report** it the data to the Doctors
- We as freshers were tested with our knowledge in this project.
- I as a member of the project had contributed almost in every aspect.
- Worked a bit on **Front End** and contributed to connect the application to **connect it to the database**
- We won the competition with this project.
